# RI TRANSPARENCY REPORT

## 2014/15

Swedbank Robur

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Swedbank Robur Ownership Policy embraces sustainability issues since over a decade ago and we state that companies must be able to handle relevant risks and opportunities in the area of corporate governance and sustainability to be competitive in the long term. The Company's responsibility within the area of sustainability should be in line with the UN's Global Compact principles, [www.unglobalcompact.org](http://www.unglobalcompact.org), which are based on international norms for human rights, working conditions, the environment and business ethics. Engagement with companies is the most important tool in our work with Responsible Investments, both related to corporate governance and sustainability. Swedbank Robur primarily exercises influence as owner in preparatory work and at general shareholders' meetings as well as by maintaining a continuous dialogue with the board of directors, company management and other shareholders when deemed appropriate. Important ownership issues include the nomination committee's proposals regarding the appointment of the board of directors and auditors, as well as their remuneration. Other items include capital structure and dividend policy, public takeover bids and share related incentive programs. Swedbank Robur has a commitment to integrating ESG-factors into its investment processes which is built on collaborations between our portfolio managers and ESG-specialists, sustainability ratings available to portfolio managers and sustainability as a part of proker evaluations. We also avoid investments in companies involved in cluster munitions, anti-personal mines, chemical and biological weapons and some companies linked to nuclear weapons. Swedbank Robur was one of the pioneers of sustainable investments in the Nordic region and launched the first sustainability fund (at that time called "ethical fund") in 1980. Today we have a range of sustainability funds, the majority of which are based on sustainability criteria with a best-in-class approach combined with norm based screening and screening of sensitive products. In addition to our fund management operations we manage large discretionary mandates with ESG-criteria.

Swedbank Robur believes that environmental and social issues and matters of business ethics and corporate governance can affect fund returns, and that Swedbank Robur has a responsibility to act in these matters in the best long-term interests of the fund unit-holders. Swedbank Robur has signed the UN's Principles for Responsible Investment, PRI, [www.unpri.org](http://www.unpri.org), an open, global initiative for institutional investors, which was launched in 2006. Swedbank Robur engages with companies as a responsible owner and refrains from investing when necessary. Swedbank Robur might also dispose of companies when company dialogue does not achieve the intended results. In particular, Swedbank Robur evaluates companies in industries and geographies with a significant sustainability risk. One of the aims of Swedbank Robur's investment process is to recognize companies that contribute to sustainable development through their products and services. The Company's responsibility within the area of sustainability should be in line with the UN's Global Compact principles, [www.unglobalcompact.org](http://www.unglobalcompact.org), which are based on international norms for human rights, working conditions, the environment and business ethics. Swedbank Robur's Board of Directors consists of six members, three of which are independent in relation to the Swedbank Robur Group and other divisions of the Swedbank Group. Corporate governance matters of an essential and principle nature are decided by the Board of Directors. Swedbank Robur's Articles of Association require that at least two of the independent Board members support the decision.

Swedbank Robur's operations are primarily regulated by the The Swedish Securities Funds Act (SFS 2004:46). The Act contains the basic rule for all fund operations, namely, that fund companies in all operations relating to management of an investment fund shall act exclusively in the common interest of the fund unit-holders. For each of Swedbank Robur's investment funds, there are also fund regulations, approved by the Swedish Financial Supervisory Authority, stating, for example, how the fund's assets may be invested. It also follows from The Swedish Securities Funds Act (SFS 2004:46) that an investment fund company may not exercise a significant influence on the management of the Company.

Since Swedbank Robur considers its participation in Nomination Committees to be highly important, it generally does participate in Nomination Committees wherever it is a major shareholder. Normally, Swedbank Robur does not participate in the Nomination Committee of Swedbank AB or in Companies that conduct operations similar with the Swedbank Group. It is important that Nomination Committee activities are conducted in such a manner that Swedbank Robur's freedom of action as regards the shares contained in its investment funds is not restricted.

OA 07.1

Provide a brief description of your organisation's governance, management structures and processes related to responsible investment.

Swedbank Robur's Board of Directors consists of six members, three of which are independent in relation to the Swedbank Robur Group and other divisions of the Swedbank Group. Corporate governance matters of an essential and principle nature are decided by the Board of Directors. Swedbank Robur's Articles of Association require that at least two of the independent Board members support the decision. Ongoing work is co-ordinated within the unit for corporate governance but members of management, asset management and the Board's independent members are also active in this work. Swedbank Robur's ownership policy has been adopted for Swedbank Robur by the Board, which also continuously reviews the policy. The ESG-analysis work is coordinated through the Corporate Governance department and Sustainable Analysis group and consists of seven employees, among them four Sustainability Analysts. The group works in close collaboration with the Investment Management teams and engages in dialogue with companies. The Committee for Responsible Investments was formed in 2012 and is an internal forum responsible for discussions regarding exclusions of companies and also engagement dialogues. Since 1996, Swedbank Robur also has an external Council for Sustainability Analysis (formerly Ethical and Environmental Council) that is responsible for the criteria for the sustainability funds. The Council has an advisory function in analysis decisions for the sustainability funds. However, Swedbank Robur is responsible for and has the decision-making authority regarding investment decisions for the sustainability funds.

Our internal ESG-department constitutes our core ESG-competence and internal experts on ESG-issues. We have two experienced governance-specialists. Our four sustainability (ES) analysts conducts sustainability analyses and are supported by our four external analysis firms - MSCI ESG Research, Ethix SRI Advisors and GES Investment Services and from 2014 also Trucost for climate data. Our internal analysts conduct the sustainability analysis of companies listed in Sweden and also screen the external analysis. This information is both used for the filter function and engagement process for our large sustainability funds/mandates and for all actively managed funds. We focus on the high risk sectors and high risk regions. The ESG-department and the portfolio managers and financial analysts collaborate. The portfolio managers have access to sustainability ratings through internal systems and are given at least bi-annual taylor-made briefings by the sustainability analysts. Our Department of Investor Risk Control check for limit breaches for every fund daily. ## Engagement

### Overview

LEA 01	Voluntary	Descriptive	PRI 2
--------	-----------	-------------	-------

**LEA 01.1** Provide a brief overview of your organisation's approach to engagement.

Engagement with companies is the most important part of Swedbank Robur's work as a responsible investor and owner. Since 1996 we have an official ownership policy.

As one of the largest asset managers in the Nordic-Baltic region, we are a major shareholder in numerous Swedish listed companies. As such, we are actively involved in corporate governance issues and strive to exercise our influence over corporate boards and management teams. By maintaining an active involvement in corporate governance matters, we strive to optimize and improve the long-term development of the companies in which we have shareholdings. This, in turn, benefits the return for our fund unit-holders. But we also see this as a way to encourage more transparent reporting in our industry and build good faith in the stock market. We mainly exert our influence as owners in advance of and in connection to general meetings and we participate in nomination committees in companies where Swedbank Robur is one of the major owners. We also maintain an ongoing dialogue with corporate boards and managements regarding corporate governance issues.

As an owner Swedbank Robur has a possibility to influence the companies' sustainability work. Our sustainability analysts regularly meet with companies to discuss their sustainability work and give improvement suggestions. We follow up the recommendations for continuity and to get confirmation that the companies develop in the right direction. To build our own view we visit the companies and make field visits. Besides tailor made company specific engagements we have identified themes around which we want to influence whole sectors. These themes are i.e. production of fossil oil and gas, energy use and climate change, palm oil production, chemicals in products, the rights of the child, taxes and anti-corruption. Most of the engagement we conduct ourselves but we also take part in collaborative initiatives (i.e. within PRI Clearinghouse) or have engagement made by our service providers.

Objectives	Environmental and social improvements in Anglo American Platinum Ltd operations in South Africa
Scope and Process	<p>Anglo American Platinum Ltd (Amplats and formerly known as Anglo Platinum Limited) is a 76.5% owned subsidiary of Anglo American plc. which faces longstanding allegations of water pollution and poor stakeholder consultation at its Mogalakwena open-pit platinum mine in the Limpopo province, South Africa. As of June 2013, the issue of water pollution was unresolved and complicated by the absence of independent water testing and lack of baseline data. Stakeholder consultation and grievance processes, which had been improved in response to allegations, were still facing some challenges and contained outstanding issues.</p>
Outcomes	<p>During 2013 Amplats demonstrated its openness by sharing information and engaging in a constructive dialogue with investors. In past dialogue, it announced that an independent review of the findings from studies on water pollution had been undertaken. In December 2014 the company provided investors with copious documentation on enquiries concerning the water tests conducted at the Mogalakwena mine. Given the extent of documentation provided, our service provider is currently evaluating the information in order to provide investors with an informed analysis of the company's measures and monitoring programme.</p>

## (Proxy) voting and shareholder resolutions

### Overview

<b>LEA 16</b>	<b>Voluntary</b>	<b>Descriptive</b>	<b>PRI 2</b>
<b>LEA 16.1</b>	Provide a brief overview of your organisation's approach to (proxy) voting (including the filing and/or co-filing of shareholder resolutions if applicable).		

Based on a high level of corporate governance, Swedbank Robur endeavors to maximize the long term value of the shares in the companies in which we invest, and thereby optimize returns for our fund unit -holders in the long term. Our ambition, through our corporate governance activities, is also to attain the highest possible level of openness, and to build well founded confidence in the equities market.

Our exercise of ownership shall primarily take place prior to and at General Meetings, through continuous dialogue with the Board and the company's management and, if deemed suitable, through coordination with other shareholders. We participates at General meetings in Sweden by attendance and outside of Sweden generally by proxy voting. Swedbank Robur can make exceptions from participation at General Meetings if it is considered of minor importance for the fund unit-holders, for example if the shareholding is insignificant in relation to other shareholders' holdings or the shareholding represents only a very small part of the investing fund's total portfolio value. The same principles are normally applied for companies listed on stock markets outside of Sweden. Swedbank Robur's ownership is mostly lower in such companies compared with companies listed in Sweden.

During the year we participated in 243 general meetings where of 108 in companies listed outside of Sweden. Our Ownership policy includes guidelines for the exercise of voting rights in Companies listed outside of Sweden. Outside of Sweden we have voted in US, Canada, within EU, Norway, Switzerland, Russia South Africa and Australia.

Important ownership issues include the nomination committee's work regarding the proposal for the appointment of the board of directors and auditors, as well as their remuneration. During the year Swedbank Robur was represented on the nomination committees of 61 companies principally through members of Swedbank Robur's management, corporate governance unit and by independent board members of Swedbank Robur Fonder AB.

Nomination committee work is an extensive engagement with the aim to file shareholder proposals for:

- Chairman of the annual general meeting
- Number of directors
- Board members
- Chair of the board of directors
- Remuneration for the board and board committees
- Auditors
- Remuneration for the auditors
- Principles for the formation of a nomination committee

The engagement includes strategic discussions with Chair and CEO, evaluation of present board, review of board evaluations, interviews with present board members, identifying profiles of new candidates, interviews with potential candidates and evaluation of auditors in cooperation with the audit committee in order to prepare and file

the nomination committee's joint shareholder resolutions for the AGM. It also includes reviewing and proposing changes to the principles for the formation of the nomination committee if deemed appropriate.

We might sometimes have to remain from voting if blocking occurs.

- We do not track or collect this information

**LEA 22.3** Additional information. [Optional]

We vote in accordance with our ownership policy which also includes guidelines for the exercise of voting rights in companies listed outside of Sweden. Our voting percentage is therefore higher in Sweden than outside of Sweden. ( See 16.1). Every company, situation and circumstances are unique and when voting cross borders the difference in legislation, practice and information may vary a lot but all voting decisions are based on the same fundamentals of our ownership policy.

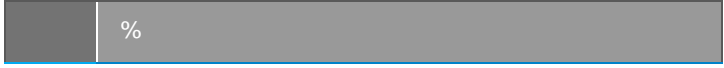

LEA 23	Voluntary	Descriptive	PRI 2

**LEA 23.2** Of the voting instructions that you and/or third parties have issued on your behalf, indicate the proportion of ballot items that were:

Voting instructions	Breakdown as percentage of votes cast
For (supporting) management recommendations	 58
Against (opposing) management recommendations	 42
Abstentions	 0

100%

**LEA 23.3** For the reporting year, describe your approach towards voting on shareholder resolutions.

We evaluate and vote on all proposals both from the company and from shareholders.

We do not track our voting instructions as a percentage of votes cast. We do not find it meaningful since the way proxies are designed varies in different countries. But we report how we voted.

[http://www.swedbankrobur.com/idc/groups/public/@i/@sc/@all/@robur/documents/article/cid\\_1467663.pdf](http://www.swedbankrobur.com/idc/groups/public/@i/@sc/@all/@robur/documents/article/cid_1467663.pdf)

Please note that all nomination committee proposals in Sweden (and sometimes in Norway and Finland too) are shareholder resolutions.

No, we do not track this information

**LEA 23.4** Additional information.

Normally if we are a large owner, as mostly in Swedish companies, we communicate with the Board and company management ahead of the general meeting in order to seek a solution that is acceptable and that we can vote for. It is therefore not so often we have to vote against a proposal and we normally do not abstain from voting in such companies. Sometimes we vote for the proposal but make a statement at the AGM or suggest changes for the future.

In 12 general meetings in companies listed in Sweden of 135 (9%) we did vote AGAINST at least one resolution.

In 91 general meetings in companies listed outside of Sweden of 108 (84 %) we did vote AGAINST at least one resolution.
